Kaiser Gorge Brandenberg

A hike through the Kaiser Gorge, steeped in history, is a grand experience. The well-secured path leads through a narrow canyon. Until 1966, the rushing stream waters were used to drift logs down the valley. This is also the reason for the still existing and accessible footpaths, which were built for the timber logging. At the end of the gorge, either walk back to the starting point along the forest path or, if you would like to take a longer tour, walk another 5 km to the Erzherzog Johann Klause.
